MEMO

TO: Art Curtis DATE: 1.8.80  
FROM: Dan Dolan SUBJECT: Taylor Site Clean-up

Simon Platus, Manager of the Allied Drum Service is interested in cooperating in the clean-up activities proposed for the A.L. Taylor Site in Louisville. Mr. Platus reportedly has some significant capability to recycle drums including somewhat dirty ones. His plant has an on-site incinerator with scrubber and filter equipment attached for both disposing of small amounts of waste residues and cleaning out residues remaining inside the drums at the time they are recycled.

Mr. Platus could be a valuable addition to an advisor staff on the clean-up operation any time activities at the site concern disposal/recycling/reclaiming. He has advised me that he would be happy to assist where possible.
